

Asia Management Associates Announces Border Closure™ Risk Protection

A Vital Insurance Against Business Disruption Due to Pandemic

Asia Management Associates' service Border Closure™ Risk Protection provides your small to medium size enterprise with an easy, low cost way to minimise the risk that your production in Asia may be at in the event that borders are closed and you or your company are unable to maintain on-site visits to your 3rd party manufacturing locations in Asia.

SARS showed how vulnerable companies in the USA, Japan, and Europe can be if and when borders close in Asia. A problem in China can quickly become your problem in your company's product portfolio. Suddenly you are not able to come to Asia. Business trips are cancelled. Not having adequate resources to accommodate these conditions can mean confusion and inability to control the situation. Now with the threat of Avian Flu and other pandemics on the horizon, you need a cost-effective way to maintain your global supply chain.

Ensuring that you have meaningful, on-the-ground advice and organisational support to handle your requirements may mean the difference between maintaining a continuous product supply, or not being able to supply your product at all.

Boots-on-the-Ground

Asia Management Associates' Border Closure™ Risk Protection provides you a partner in Asia to:

- help you to maintain vital on-going product supply
- provide Product Development and Project Management resources
- your "Boots-on-the-Ground" support to provide clear and operationally strategic management for your affected supply chain
- quality control services
- production progress reports
- visual records of production and product development status

We become your virtual representative at your 3rd party manufacturing entity.

Since Asia Management Associates maintains a local presence in Asian countries, are able to send our Team into your factory and be your local eyes and ears and provide you with useful, verifiable information and to be your local effective support to see your operation through the crisis.

By contracting AMA before a pandemic begins, we begin the process of familiarisation with your requirements. For a small monthly fee we become knowledgeable of your production and product development programs. When you come to Asia we will assist you and accompany you to your production locations. We will provide for you a basic array of services you wish to contract for. In the event of your not being able to come to Asia due to borders closing, or your company not allowing business trips to affected areas, our Team then will then be a position to visit your factories directly and push for on-time completion and assist in maintaining quality control.

Low Cost Risk Insurance

Providing you an insurance against pandemic, risk containment need not cost you any more than what you might normally spend on a few business trips to Asia.

Asia Management Associates is able to provide this unique support plan since we operate throughout Asia, and understand the requirements of what it takes to maintain a global supply chain.
